The institute has established a system of evaluation of competencies of dental students using following assessment methods

Steps taken by the institution to access the attainment of a specific competency of the undergraduate students/ interns as per in the curriculum is as follows:

1. Continuous internal evaluation (CIE)
 - Theory assessment
 - Practical assessment
2. Laboratory exercises
 - Practical skill evaluation
3. Objective structured clinical examinations (OSCE)
4. The objective structured practical examination (OSPE)

METHODS OF THE ASSESSMENT OF LEARNING OUTCOMES AND GRADUATE ATTRIBUTES

Outcomes Assessment Methods

Outcomes assessment can measure formative outcomes (i.e., during program) or summative outcomes (i.e., end of program).

1. Formative assessment measures specific knowledge, skills, abilities, and attitudes at

regular intervals while students are enrolled in programs.

2. Summative assessment measures students' entire educational experiences in a program, usually at the end of the program.

Assessment methods can be direct (e.g., tests) or indirect (e.g., main and library dissertation).

Types of assessments include:

Class tests

· Online tests

Group discussion

Lab work

Simulations

Problem solving exercises

Viva

Project works

Conference presentations

Research activities

Seminars

Co-curricular activities

Quizzes

Objective tests

Seminars

Essay writing Article review

Dissertation Field works etc
