## TO WHOMSOEVER CONCERN

Regarding international student cell

Pandit Deendayal Upadhyay Dental College, Solapur is located in western Maharashtra. Though it is well connected by road and rail it lacks air connectivity which is a major hindrance in attracting international students. The college is developing rapidly as a centre of excellence in dental education and very soon we hope to become a destination for international students. Therefore, since the college caters to all the needs of any admitted student from foreign land, we are in a process of setting up of international student's cell in near future and hopefully the lack of air connectivity will be overlooked.

From the point of view of infrastructure, teaching and learning, research and extension activities, students support system, best practices the Institution has been playing a vital role in sending the dental graduates across the globe to practice with quite a few students having pursued higher education overseas and having settled abroad. The eligibility certificate of foreign/NRI/SAARC category can be availed from the university by filing necessary application with supporting documents.
