them to meet various challenges in the walk of life.

Nature of governance

The institute boasts of an open and transparent climate and believes in decentralized and participative management.

The policies, rules and regulations and decisions involve active, constructive and contributory participation of Dean, HODS, faculty members and student's representatives for continuous improvement of the curriculum, teaching-learning process, evaluation, research, financial management and student support-services. Decisions taken by the management are conveyed to all HODs who then hold regular inter-departmental meeting with faculty and support staff to look into any deficiencies at grass root level.

All suggestions/decisions of the heads of the faculties and departments are submitted to the dean for making strategic decisions, Internal financial audit of the Institution by the auditors Maniyar and associates insures the checks and transparency in financial transactions.

The institution maintains effective internal co-ordination and monitoring mechanism with various departments and committees formed by the college for curricular, co-curricular and extra-curricular activities.

Stakeholder's participation in decision making:

Feedback from all its stakeholders is given prime importance. The college obtains the feedback from the students on teaching, infrastructural facilities, learning resources and student support services, feedback from the management, parents, academic peers, patients, alumni and community.

Student feedbacks give an insight to the lacunae in the curriculum and grey areas in teaching and are taken care of immediately.

Patient feedback is collected in all departments with an intention to ensure patient satisfaction, safety and to make necessary improvements.

Parents/alumni/faculty opinions and feedbacks are taken and given due consideration.
